

INDUSTRIAL HYGIENIST OPPORTUNITY

NIOSH Respiratory Health Division - Field Studies Branch | Morgantown, WV

NIOSH is seeking a strong candidate for an Industrial Hygienist fellowship position. The ideal candidate will have some background in ventilation, but candidates who are willing and able to develop ventilation expertise through formal training are also encouraged to apply.

Position at a Glance

Position	Associate Service Fellow or Senior Service Fellow
Field	Industrial Hygienist
Education	Master's level or higher
Ventilation	Some experience preferred, or a strong interest and ability to develop expertise
Ideal Fit	Works well on teams and enjoys fieldwork
Location	NIOSH Respiratory Health Division, Field Studies Branch - Morgantown, WV

About the Fellowship

The Associate Service Fellow and Senior Service Fellow roles are fellowship positions that are renewed every few years when performance is strong and the position remains a good fit. Fellows who excel may also be well positioned to compete for permanent openings when they become available. Many individuals in the branch began as fellows and later converted to permanent positions after successfully competing for an opening.

What the Work Looks Like

The Field Studies Branch performs exciting work through the NIOSH Health Hazard Evaluation (HHE) Program. Team members conduct onsite workplace surveys across the country and also participate in research, providing a rewarding combination of fieldwork and desk work. The branch assists many different types of workplaces and offers opportunities to travel, collaborate, and contribute to meaningful occupational health work.
